**"Best value through partnership....."**

## Environmental Policy Statement

Ridge Crest Cleaning recognises its responsibilities as a leading support services company in its role of protecting the environment, both for today and in the future.

It is felt that liaison between our clients, suppliers and local site management forms the front line in developing environmental solutions that are in compliance with environmental legislation. Furthermore, Ridge Crest commits to ensuring that all relative legislation is fully complied with.

Our focus therefore, is on a pro-active policy to further promote a practical day-to-day commitment, in partnership with all client needs and specification. Some jobs have obvious potential to cause a detrimental environmental impact. Incidents such as spillage of chemicals, improper disposal of waste chemicals or other unnecessary emissions to water and the atmosphere must be prevented and reported immediately to line management if they occur. Likewise, practices and procedures that do not minimise adverse effects on the environment must be referred to line management. New initiatives can then be implemented as appropriate.

All supervisory and management staff are made aware of the environmental implications of the tasks for which they are responsible. Through training initiatives they ensure that all necessary equipment, procedures and working practices are in place and all appropriate training has been given to their staff. Ridge Crest and its suppliers operate within, and are totally committed to, high environmental standards. Our supervisory and management staff are in place to ensure that our policy and culture of care for the environment is implemented throughout the business.

Ridge Crest is committed to working with companies who ensure that their manufacturing processes produce environmentally friendly products. Ridge Crest will, as far as possible, only associate itself with suppliers who support these endeavours.

Overall, Ridge Crest Cleaning is committed to protecting the quality of life for future generations by adhering to a sound Environmental Management System. We recognise that there is always room for improvement and only via continuous commitment and education can we make a valid contribution to the environmental cause.
